

Premium Edges

These are just a few of the many upgraded edges available. Thicker edges can be made by laminating additional layers of stone together. With our skilled craftsmen and state of the art router machines we can make the edge that you need to put the finishing touch on your custom project.

2cm Premium Edges – 1 1/2” Thick (with lamination)

3cm Premium Edges – 1 1/8” Thick (no lamination)
